Education

University College London

Sep 2025 - Present

MSc Health Data Science (Distinction Expected)

London | UK

- **Core Modules:** Data Science and Statistics, Artificial Intelligence in Healthcare, Advanced Machine Learning for Healthcare, Advanced Data Science and Statistics

Imperial College London

Sep 2021 - Jun 2024

BSc Biological Sciences (Upper Second Class Honor)

London | UK

- **Core Modules:** Mathematics, Bioinformatics, Programming and Statistics, Computational Omics, Integrative System Biology

Work Experience

Data Analyst Intern

Sep 2026 - Present

TikTok UK

London | UK

- Built an AI agent that automates repetitive steps of the analytics workflow, adopted by the wider team and partner teams to improve efficiency across teams
- Mine large-scale merchant and transaction data in SQL and Python to identify growth and operations drivers that shape TikTok Shop's UK market-entry and expansion strategy
- Build KPI frameworks and dashboards used by e-commerce teams to set targets and track initiatives, turning findings into recommendations for operations, product and commercial stakeholders

Data Scientist Intern

Jul 2026 - Sep 2026

DS Digital Technology

Hangzhou | CN

- Designed a 246-question benchmark and 6-dimension safety rubric for a pharmaceutical client, adopted as the acceptance standard for evaluating patient-facing AI answers
- Developed a Python pipeline calling 6 LLM APIs with retrieval and search augmentation, producing and scoring 2,400+ responses with an LLM-as-judge framework
- Built a medically reviewed knowledge graph and ran blinded A/B tests of its effect on answer quality, presenting findings and priorities to client stakeholders

Data Analyst Intern

May 2025 - Aug 2025

Ipsos Strategy3

Beijing | CN

- Structured and analysed data from 80+ healthcare professional interviews to identify market and customer patterns
- Analysed market datasets to assess industry trends, competitive dynamics, and growth opportunities
- Translated analytical findings into visualisations and data-driven recommendations for client stakeholders

Project Experience

Causal ML Model for Cardiovascular Risk Simulation

Dec 2025 - Sep 2026

University College London

London | UK

- Built an end-to-end machine learning pipeline on longitudinal biobank data, engineering multi-timepoint features to predict cardiovascular risk
- Developed and validated predictive and causal models that estimate individual-level counterfactual risk under lifestyle interventions
- Deployed a Streamlit simulation app that translates model outputs into actionable, user-facing insights for preventive healthcare

Skills

Programming: Python, SQL, R, Linux shell

Statistics and Experimentation: hypothesis testing, A/B testing, causal inference, experimental design, permutation methods

Machine Learning and AI: scikit-learn, PyTorch, XGBoost, Hugging Face Transformers, LLM evaluation, RAG, knowledge graphs

Data and Tools: pandas, NumPy, Matplotlib, Power BI, Excel, Git, Docker, Streamlit, AWS

Languages: English (fluent), Mandarin (native)
